

Are you kidding? Is this a joke? I absolutely LOVE XM Radio! It was given to me as a Christmas gift in 2001 and at the time I thought it was a waste of money. "Why would I need a satellite radio, when I have a perfectly good radio in my car now? Plus I have to pay for the service?" Well here I am 2 years later and I can't imagine my car without it. The reason why I always hated listening to the regular radio was there were way too many commercials and you are at the mercy of what the DJ likes, not what may be the popular song, and need I mention Howard Stern. Now I can listen to whatever I feel like, current country, classical, the old radio series, comedy, a live concert, current rock, old rock, not to mention the newest feature local weather and local traffic. I know you can get local weather on TV, but the local traffic is the best when I am on the road and need immediate traffic in case I have a time issue. I realize the traditional radio stations don't like it, but isn't that what makes us America? The freedom to make a choice and spend my money the way I want to. When Wal-Mart came around everyone said it would hurt the malls and small businesses. BULL! The mall is still around, and so is downtown Melbourne. I am using MY money to make MY choice to listen to XM Radio, if the NAB doesn't like that then I guess they need to find a way to make radio better for everyone. I'm sure they have the money since they are spending so much of it trying to tell me what I can and cannot listen to. We are a country envied by most other countries simply because we have the freedom to make choices in our personal lives and nobody, not the NAB and not even my government, gets to change that. Our founding fathers came here because they wanted to be able to make choices for themselves, not be dictated to and the result was the birth of a nation: the United States of America. The Bill of Rights and the Constitution allow me to make choices for myself. God Bless America!!!!
